

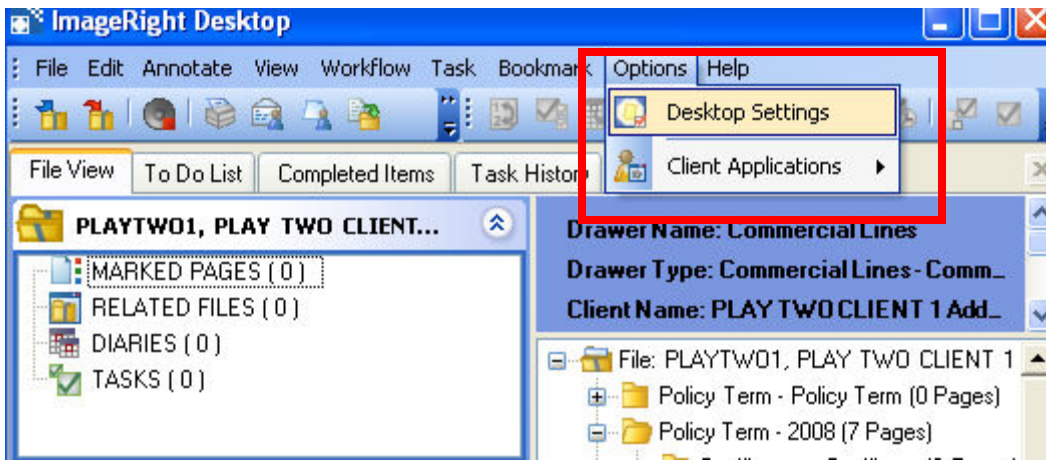

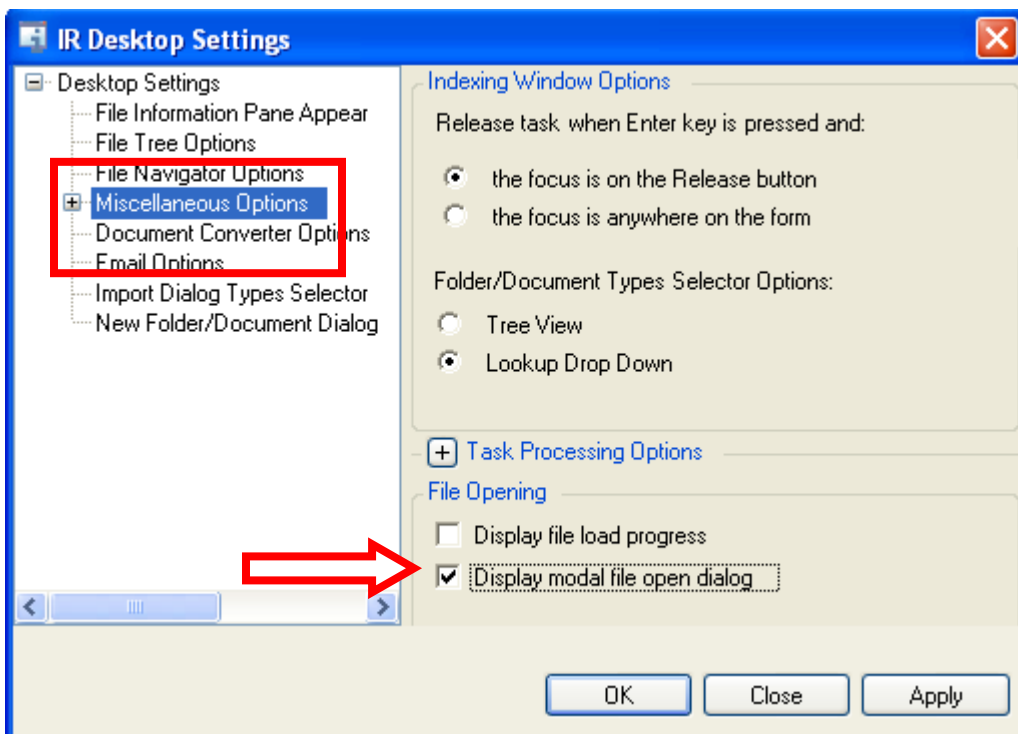

IMAGERIGHT FUNCTIONALITY FILE OPEN DIALOG BOX MODAL

1. Click on OPTIONS
2. Click on DESKTOP SETTINGS

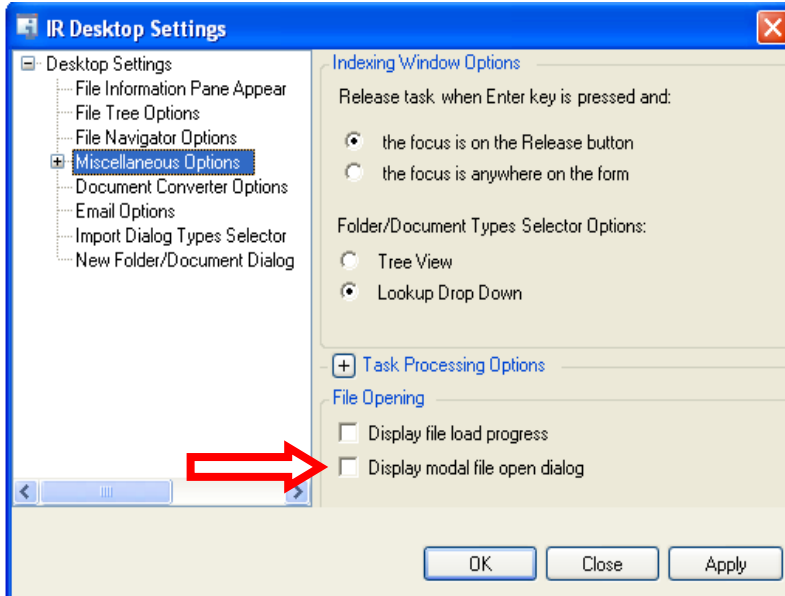

3. Click on MISCELLANEOUS OPTIONS in the Tree
4. Under FILE OPENING (bottom right), if the “Display modal file open dialog” is checked, then the File Open dialog box will be the point of focus when it’s open. While the File Open dialog box is modal, you cannot press any buttons, select commands, enter any information, or open the client’s tree in the Desktop without closing the dialog box.

IMAGERIGHT FUNCTIONALITY FILE OPEN DIALOG BOX MODAL

5. Uncheck the “Display modal file open dialog” and the system will allow you to press any buttons, select commands, enter any information, or open the client’s tree in the Desktop without having to close the dialog box.
6. Click APPLY
7. Click OK or CLOSE

8. Open the File Open dialog box
9. Uncheck “Close Window After Selection” to keep the File Open dialog box results open as you browse the client in File View.
